

INTRODUCING VISIFI'S "TRIPLE PLAY" DIGITAL SUITE

INTEGRATES SEAMLESSLY WITH ALL CORE BANKING PLATFORMS

As rare as a Triple Play is in baseball, it is even less common in digital technology. Until now, opening an account, managing finances and applying for a loan, were three unique experiences for credit union members. From a branding and service perspective, it's the equivalent of sending them to three different branches to meet their needs. Now with VisiFI's Digital "Triple Play", your members can have one seamless experience from applying for the loan, being approved, opening an account and funding that account immediately, all within a single seamless experience and without ever having to enter the branch. **This is the future of banking, and VisiFI is leading the transition.**

GIVE YOUR MEMBERS A COMPLETE DIGITAL BRANCH EXPERIENCE

Not only is our digital suite complete, it is fully featured, highly secure and driven by behavioral science to provide intuitive navigation and easy to use features. In addition, each module is supported by administrative consoles that are easy to use and intuitive for your staff to manage. Our customers can choose one or all the features that are designed to capture data and pass it through each application, creating the perfect platform to attract new members and loans.

- **Digital Account Opening** – Whether applying for a loan or just wanting to join, the Digital Account Opening module guides the consumer through the process, painlessly and quickly. And you set the standards of approval automation, which allows you to customize the process based on your comfort level.
- **Digital Lending** – This solution ties directly into the Account Opening module, sharing data to avoid repetition and speeding up the process. Again, automate your underwriting steps based on your comfort level and manage the remaining loan approval steps through an administrative dashboard that lets you know at all times where you are in the process.
- **Digital Banking** – VisiFI's award winning online and mobile solution is fully featured and completely customizable, running on a robust security platform that keeps your members engaged, secure and happy.

So, don't just coast through the digital transformation, embrace it! No matter what core system you are using, there is nothing holding you back from attracting younger members, improving retention, or expanding your service area. Our customers have seen amazing results immediately after going live. We believe you will too!

You really have to see it to believe it. **Call or reach out to VisiFI today to set up a virtual demo and truly see what a full service digital branch looks like.**
