

RTP FUNDING AGENT

Acting as an intermediary, CACU streamlines the funding process, ensuring smooth liquidity management and enhancing the overall payment experience.

LET CACU REVOLUTIONIZE YOUR FUNDING PROCESSES

With CACU as Funding Agent, you'll gain seamless and efficient funding operations.

Optimized Liquidity Management

Real-time payments require 24/7/365 availability of funds for immediate settlement. By utilizing CACU as a funding agent, credit unions can ensure efficient management of liquidity by maintaining adequate funds, reducing the risk of liquidity shortfalls.

Simplified Cash Flow Management

CACU can provide centralized control and coordination of funds, simplifying the cash flow management process. This allows our members to focus on their core operations without the burden of closely monitoring and managing individual payment transactions.

Expertise and Infrastructure

Utilizing CACU as funding agent allows our members to leverage our expertise and existing infrastructure for real-time payments. CACU has established connections with the RTP network and multiple core processors, which streamlines the integration process and reduces implementation complexities for the credit union.

Real-Time Settlement

Leveraging the RTP network's real-time capabilities enables financial institutions to settle funds instantly. This eliminates the delays and inefficiencies associated with traditional settlement processes, resulting in faster cash flow management and timely execution of payments and transactions.

Dedicated Support & Collaboration

CACU is committed to providing exceptional support and guidance to our members. We are backed by a team of experts who offer proactive assistance in optimizing funding processes and exploring customized solutions.

Cost & Efficiency Benefits

Your credit union is able to avoid the need to invest in and maintain the substantial infrastructure and resources required for real-time payment processing.
